

Inspection Video Scope

7. Mirror Mode

Select this function while the mirror adapter is attached on the tip of the insertion tube. It will correct the opposite side image from the mirror. The date/time won't be shown on the screen while the function is activated.

The reflected image is only displayed on LCD screen for instant visual check. Photos and videos are saved as the original files (opposite image).

Inspection Video Scope

1. Power on/off

Hold the Power key for 2 seconds to activate the machine. The system will be always standby at "Preview Mode" as the power is on. The top corner of the screen will show the system time and battery icon (As shown in the picture below,  is the battery capacity meter).

2. Taking photos

Under Preview Mode, press  key to take a photo. The system will show the image on screen for about 2 seconds, then the system will automatically return to the Preview Mode.
